

CLAIMS

1. (Amended) An acrylic elastomer composition, which comprises a carboxyl group-containing acrylic elastomer, (A) a vulcanizing agent of polyvalent amine compound, and (B) a thiazole-based compound selected from 2-mercaptobenzothiazole, or its zinc salt, or dibenzothiazyl disulfide.
2. An acrylic elastomer composition according to Claim 1, wherein the carboxyl group-containing acrylic elastomer is an aliphatic unsaturated dicarboxylic acid monoalkyl ester-copolymerized acrylic elastomer.
3. An acrylic elastomer composition according to Claim 1, wherein 0.05-10 parts by weight of the thiazole-based compound is contained on the basis of 100 parts by weight of the carboxyl group-containing acrylic elastomer.
4. An acrylic elastomer composition according to Claim 2, wherein 0.05-10 parts by weight of the thiazole-based compound is contained on the basis of 100 parts by weight of the carboxyl group-containing acrylic elastomer.
5. An acrylic elastomer composition according to Claim 1, wherein the thiazole-based compound is used together with an amine-based or phenol-based antioxidant.
6. An acrylic elastomer composition according to Claim 2, wherein the thiazole-based compound is used together with an amine-based or phenol-based antioxidant.
7. (Amended) An acrylic elastomer composition according to Claim 1, wherein 0.1-5 parts by weight of a vulcanizing agent of polyvalent amine compound is further contained on the basis of 100 parts by weight of the carboxyl group-containing acrylic elastomer.
8. An acrylic elastomer vulcanization-molded article, vulcanization-

molded from an acrylic elastomer composition according to Claim 1.

9. (Deleted)

10. An acrylic elastomer vulcanization-molded article according to Claim 8, which has parts in a wall thickness of not more than 30mm.

11. (Deleted)

12. An acrylic elastomer vulcanization-molded article according to Claim 10, wherein the vulcanization-molded article having parts in a wall thickness of not more than 30mm is a gasket or O ring.

13. (Deleted)
